

Craig M. Block *Project Engineer/CAD*

EDUCATION

American Institute of Design
Associate Degree

EXPERIENCE

Craig has 31 years of hands-on experience as a project engineer and draftsman in the structural engineering field. After developing advanced skills in hand and CAD drafting, Craig was self-taught, with the help of mentors, to learn engineering design. He now uses these skills to design the structural systems for buildings and CAD drafting to produce concise and comprehensive construction documents.

Craig joined Harrison-Hamnett, P.C. in 1997 and has been the project engineer and CAD person for some of our largest and most complex projects.
