EXPERIENCE

Throughout his 28 years of experience, Mr. Harrison worked on various project types including commercial, residential and institutional. In 1981, he joined Blackburn Engineering as a Project Engineer, where he managed structural design, field supervision, client communication and supervised drafting for all of his projects. Mr. Harrison became a Principal at Blackburn Engineering in 1986 and shared ownership interest in the firm, which included sharing in overall project and company management.

Historical Restorations and Renovations are of particular interest to Mr. Harrison. His expertise in Historical Preservation spans commercial, institutional and residential buildings. He maintains an understanding of older structures and techniques to creatively develop structural detailing to restore the buildings.
